

VIP Interior Suite DHC-8 100, 200, 300

Benefits

- Provides operator with ability to offer dual-class seating in aircraft
- Various configurations available (4, 6, 9 VIP pax)
- Permanent or quick-change installation
- Variety of options and finishes available to customize interior
- Proven design installed on multiple aircraft
- Kit available for remote installation

The FIELD AVIATION designed VIP Interior Suite STC for the DHC-8-100/200/300 aircraft provides executive seating and conference tables in the forward passenger cabin. Economy seating is retained in the aft cabin for a mixed-class configuration.

The basic VIP cabin consists of club-configured VIP seats in a 2-abreast (1+1) or 3-abreast (1+2) arrangement. An additional row of VIP seating is also available to increase the size of the VIP cabin.

The 9g (TSO-C39b) certified VIP seats provide a generous 20" width between arms on the single seats and 19" per seat place on the double seats. The seats are upholstered in leather with swivel, recline and in-base tracking.

The fixed-height conference tables provide a comfortable working surface with recessed cup holders for each VIP passenger. Tabletops can be finished in a variety of simulated wood grain patterns.

Class dividers (hard partitions or curtains) provide separation between the VIP and Economy cabins.

The existing economy seat tracks are retained with the VIP Interior installation to permit quick-change convertibility back to all-economy configuration if required
