

G3 Galley Convection Ovens

DHC-8 400

Benefits

- Provides hot meal service for 12 to 40 passengers in one heating cycle
- Minimal structural modification required to the G3 galley

Typical Leadtime

- 12 Weeks ARO

Certification

Basis

- TC STC
- EASA STC

Complimentary Modifications

- Coffee Maker can be replaced
- with Espresso Machine
- (plumbed or manual fill unit)
- China, Crystal, Flatware storage
- inserts for Atlas half trolley
- cart(s)

The FIELD AVIATION G3 Galley Convection Ovens provides airlines with the opportunity to offer hot meal service to passengers.

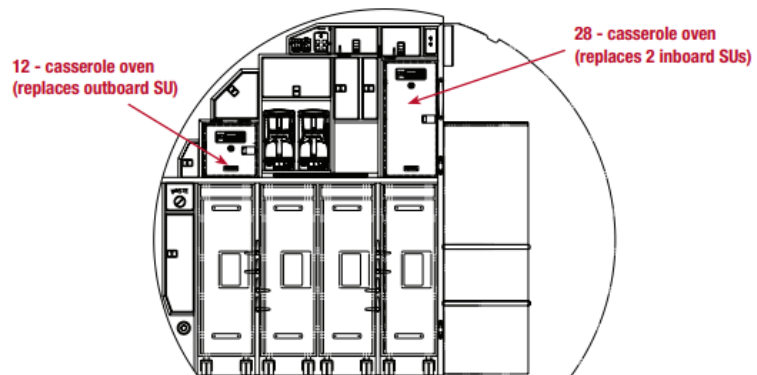

Two sizes of convection oven are available for installation in the aft G3 Galley:

- A 12-casserole oven
- A 28-casserole oven

The 28-casserole oven is normally installed replacing the two inboard Standard Units as shown. However, it can be installed lower down, replacing the most outboard Atlas half-trolley cart, if the two inboard SUs are required to be kept. There is an additional change for this optional location.

Either one, or both, of the above ovens can be installed.

Kit Price and Delivery

Kit price is US \$2,700 per aircraft. Fleet volume discounts may apply. Typical lead time is approximately 2 weeks ARO.
